

Controlled Waste Transporter Certificate of Registration No. 11121/2

Issued under Regulation 15 of the *Environmental Management and Pollution Control (Waste Management) Regulations 2020*

Issued to:

DECON DEVELOPMENTS PTY LTD

ACN:

655 831 691

Controlled Waste Transporter unique registration number:

7942

Address for legal documents:

31 THISTLE ST, SOUTH LAUNCESTON TAS 7249

Waste category or categories:

The above registered Controlled Waste Transporter is authorised to take possession of for transport by vehicle, to transport by vehicle, and to deliver possession of to a facility operator, a controlled waste specified in Schedule 1 of this certificate.

Conditions imposed:

1. A copy of this Certificate of Registration must be kept at all times in each vehicle used to transport controlled wastes and must be presented to an authorized officer upon request.
2. The registered controlled waste transporter must take all reasonable steps to ensure that all persons involved in the transportation of controlled wastes are familiar with these conditions and the authorised waste categories to the extent relevant to their work.
3. Controlled waste must be transported to a facility that has a relevant authority to receive the waste or managed in accordance with an approved management method.
4. If an incident causing environmental harm occurs in the course of the collection, transport or delivery of waste, the registered controlled waste transporter must immediately take all reasonable and practicable actions to minimise any adverse environmental effects from the incident, in accordance with, but not limited to, any applicable Spill Management Plan.
5. A Spill Management Plan or Plans appropriate for all controlled waste being transported must be kept at all times in each vehicle used to transport those controlled wastes.
6. The relevant Spill Management Plan must be presented to an authorized officer upon request.
7. The relevant Spill Management Plan must be presented to any officer from any of the emergency services (e.g. fire, police, State Emergency Services) upon request in the event of an incident.

8. All persons involved in collecting and transporting controlled waste must be familiar with the relevant Spill Management Plan held in a vehicle, prior to collection and transport of the controlled waste, and must be competent in the implementation of any measures required by the Plan.
9. A Spill Management Plan must include:
 - (a) Details of any properties the controlled waste may have that may affect the environment or human health and safety;
 - (b) Procedures for appropriate containment and handling of the controlled waste during collection and transportation to reduce the potential for the emission of controlled waste to the environment;
 - (c) A list of actions to be taken to contain, treat, control, recover and dispose of any controlled waste which may possibly leak, spill or accidentally escape during loading, transit or unloading of the waste, as a result of an accident, malfunction or other incident involving a vehicle carrying that waste, or for any other reason;
 - (d) Contact details for the person responsible for coordinating the response to any incident involving the release of the controlled waste, where that person is not the driver of the relevant vehicle;
 - (e) An itemised list of equipment and other resources necessary to contain, treat, control, recover, and dispose of any wastes which might leak, spill or accidentally escape; and
 - (f) Recording and reporting procedures for incidents resulting in the emission of a controlled waste to the environment, which provide for an account of the location, time and cause of the incident, the quantity of controlled waste released, the effect of that release, and the actions taken to manage the release.
10. Vehicles used to transport controlled waste must carry equipment and other resources necessary to implement the actions specified in the relevant Spill Management Plan or Plans.
11. Subject to these conditions, the controlled waste must not be transported in a vehicle other than a vehicle specified in Schedule 2 attached to these conditions.
12. The registered controlled waste transporter may transport an authorized controlled waste in a vehicle not specified in Schedule 2 provided that an application under and in accordance with Regulation 13(3) is submitted to the Director:
 - (a) prior to taking possession of the load of waste;
 - (b) including the registration number, make, body type and carrying capacity in tonnes of the vehicle; and
 - (c) including a statement by the registered controlled waste transporter verifying that the vehicle complies with all relevant conditions of the Registration.
13. Written notice of any change of registration of a vehicle or change to the design or construction of a vehicle which will change the waste carrying capacity of that vehicle, must be provided to the Director prior to the use of the vehicle to transport controlled wastes.
14. Each vehicle used to transport controlled waste must be constructed and maintained so as to prevent the spillage of any controlled wastes carried.
15. Vehicles must be appropriately fitted or equipped for each consignment of controlled waste, and in particular must comply with the following requirements:
 - (a) All liquid waste and waste that contains free liquid must be transported within sealed leak-proof containers to prevent loss or spillage during transit;

- (b) All non-liquid waste must be covered during transit to prevent loss or spillage and to reduce emission of dust to the greatest practicable extent;
 - (c) All waste that produces or is likely to produce odours must be transported in such a manner that odours are reduced to the greatest practicable extent; and
 - (d) All waste that may attract vermin or insects must be transported within containers that prevent entry of vermin or insects, as the case may be.
16. The registered controlled waste transporter must ensure that any tank or other container used to transport controlled waste and not otherwise affixed to the vehicle is secured on the vehicle carrying the container in a manner that prevents toppling, spillage or movement under normal vehicle usage.
17. On request by an authorized officer, a registered controlled waste transporter must present a vehicle to an approved inspector for inspection, and a copy of any inspection or defect report provided by the inspector must be submitted to the Director within 14 days of the inspection being carried out.
18. Controlled wastes must be transferred to and from vehicles in a secure and safe manner and in accordance with any relevant authority such that:
- (a) the risk of spillage and/or accidental releases of the waste to the environment is prevented to the extent that is reasonable and practicable;
 - (b) dust and odour are controlled to the extent reasonable and practicable;
 - (c) any spillages or accidental releases of the controlled waste can be contained; and
 - (d) the controlled waste cannot be readily accessed by unauthorised persons.
19. Any contaminated cleaning residue must be captured and managed in an appropriate manner so as to reduce the likelihood of environmental harm occurring.
20. Unless otherwise approved in writing by the Director, or under another relevant authority, the transport of a consignment of controlled waste may be deferred for a period of up to 3 days provided that:
- (a) the controlled waste is secured and remains under the control of the registered controlled waste transporter; and
 - (b) the controlled waste is managed to prevent environmental harm including environmental nuisance.
21. When the Director, by notice in writing, requests information relating to controlled waste transported, this information must be provided for the reporting period specified, and in the form approved by the Director. The information must be provided within the timeframe specified by the Director.
22. Movement of controlled waste to a State or Territory other than Tasmania must not be undertaken.

DELEGATE FOR THE DIRECTOR, ENVIRONMENT PROTECTION AUTHORITY

Date: _____

23 November 2022

Schedule 1: Wastes

Waste Code	Waste Category
N120	Soils contaminated with a controlled waste
N140	Fire debris and fire washwaters
N220	Asbestos

Schedule 2: Vehicles

Registration Number	Vehicle Make	Vehicle Type	Carrying Capacity (tonnes)
E72CN	ISUZU	TIPPER TRUCK	10.4
E57VL	MERCEDES BENZ	TILT TRAY TRUCK	30.0
FF2390	MITSUBISHI	TIPPER TRUCK	4.5
C45SY	KIA	TIPPER TRUCK	2.8
Z94SX	PHOENIX	TIPPER TRAILER	2.0
C2DEMO	TOYOTA	TIPPER TRUCK	2.71
FA2303	INTERNATIONAL	TIPPER TRUCK	21.0
I84PQ	NISSAN	UTILITY	4.95
I08MK	TOYOTA	UTILITY	4.95
EO8272	WHITE	TRUCK	23.9

Schedule 3: Definitions

'Approved inspector' means any inspector approved by the Department of State Growth to inspect and certify vehicle specifications set out by Australian Standards.

'Australian Standard' or **'AS'** means an Australian Standard published by Standards Australia International Ltd. Any reference to an Australian Standard is a reference to the most recent edition of that Standard, unless otherwise stated.

'Authorized officer' means an authorized officer under section 20 of EMPCA.

'Controlled waste' has the meaning described in Section 3(1) of EMPCA.

'Director' means the Director, Environment Protection Authority holding office under Section 18 of EMPCA and includes a delegate or person authorised in writing by the Director to exercise a power or function on the Director's behalf.

'EMPCA' means the *Environmental Management and Pollution Control Act 1994*.

'Environmental harm', **'material environmental harm'** and **'serious environmental harm'** each have the meanings ascribed to them in Section 5 of EMPCA.

'Environmental nuisance' has the meaning ascribed to it in Section 3 of EMPCA.

'Non-liquid waste' means any waste that:

- (a) does not become free flowing at or below 60 degrees Celsius or when it is transported;
- (b) does not contain, or is not comprised of, any free liquids; and
- (c) does not contain, or is not comprised of, any liquids that are capable of being released when the waste is transported.

'Pollutant' has the meaning ascribed to it in Section 3 of EMPCA.

'Registered controlled waste transporter', for the purposes of these conditions, includes an employee or agent of that person.

'Regulations' means the *Environmental Management and Pollution Control (Waste Management) Regulations 2020*.

'Truck wash facility' means a facility used for washing trucks or other vehicles and tanks for the carriage of waste which is designed in a manner that enables the capture of all wash waters and contaminants such that the wash water and contaminants may be treated and/or disposed of in a manner that does not cause environmental harm.

'Vehicle' means any road vehicle used for collecting or transporting controlled wastes.

Schedule 4: Information

LO1: EMPCA

The activity must be conducted in accordance with the requirements of the EMPCA and Regulations made under the EMPCA. The requirements of these conditions of registration must not be construed as an exemption from any of those requirements or principles.

LO2: Storage and handling of Dangerous Goods and Dangerous Substances

The storage, handling and transport of dangerous goods and dangerous substances must comply with the requirements of relevant State Acts and any Regulations made under those Acts, including:

- 1.1 Dangerous Goods (Road and Rail Transport) Act 2010;*
- 1.2 Work Health and Safety Act 2012;*
- 1.3 Dangerous Goods (Road and Rail Transport) Regulations 2010;*
- 1.4 Work Health and Safety (Supplementary Requirements) Regulations 2012.*

OI1: Notification of incidents under section 32 of EMPCA

Where a person is required by section 32 of EMPCA to notify the Director of the release of a pollutant, the Director can be notified by telephoning 1800 005 171 (a 24-hour emergency telephone number).
